↺ Cloud Backup
for SharePoint and OneDrive for Business

Data Protection Required for SharePoint and OneDrive for Business
32%
Data Loss in the Cloud

SharePoint and OneDrive have no archiving or expanded data protection features to recover lost data. With all you have invested in your data and 32% of companies reporting data loss in the cloud, a backup solution is critical for your business.[1]

Data loss can be costly

Pepperdine University calculated the predictable cost per data loss to be **$3,957**[2]. However, depending on the content loss, that cost could be higher and even more devastating to a business.
- Value of Lost Data
- Technical Services
- Lost Productivity

$217
$340
$3400

Data loss can be stressful

Just the thought of data loss is stressful. But it doesn't have to be. With a backup solution, instead of reacting in panic to a data loss event, you can instead quickly and simply restore that data and get back on track quickly.

Causes of data loss in SharePoint and OneDrive for Business

SharePoint Site Admins can permanently delete their SharePoint data, making it immediately unrecoverable.

Corrupted files can take hours to rebuild.

Office 365 Business Data

Items in recycle bin are unrecoverable after 186 days.

End Users can permanently delete data in their OneDrive for Business account, making it immediately unrecoverable.

A Backup Solution

Pay a predictable, low, fixed monthly price per user to quickly and easily get your employees back on track
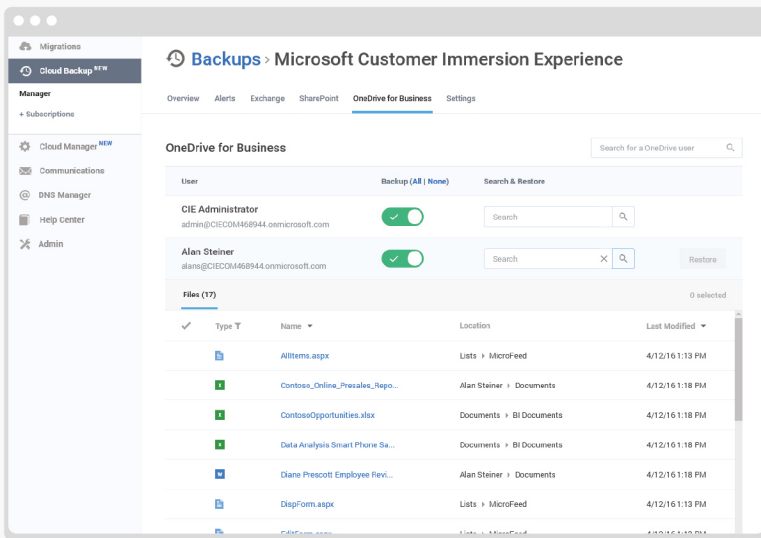

No Backup Solution

Risk unpredictable and potentially devastating per-incident costs
